

*Folie à Deux*

### **Technical Specification**

#### **Get In/Out:**

- Our get-in is to be done the day before the performance, but can be done on the day in special circumstances.
- Our get-out takes between 1-2 hours and is done immediately after the show is complete.

#### **Stage Dimensions:**

- Minimum:
  - 6.7m in width
  - 4m in height
  - 6m in depth

#### **Lighting:**

- We will require 1 technician from the venue to control our lighting during the performance and to set/focus lights before the show.

#### **Sound:**

- No technician required - we control all of the sound ourselves.
- We only require a sound system with a standard input. Sound is played from a laptop, through a DI box.

#### **Touch-screen:**

- No technician required - we control all of the technical aspects ourselves so nothing will be needed from the venue apart from plug sockets!

#### **Rigging:**

- One single rigging point centre stage right to hold a light weight object (not to hold the weight of a person, just to hang something from). However, if this is not possible we can arrange something else but please let us know before booking.

#### **Other:**

- We require one parking space to park our long-wheel based van.
- We will require a suitable dressing room with two drinking water bottles to go either side of the stage during performance.
- We will be selling programmes for the performance so will need someone front-of-house to do this. (If this cannot be provided please let us know in advance).
